Degree programme

Google, Spotify, Zalando - **international digital companies** of all kinds enrich our everyday lives and dominate the economy and society. Their success is based on digital business models, new forms of collaboration, and their employees' digital skillset. Likewise in **Berlin's ecosystem of digital startups**, creative teams of young professionals are working today on tomorrow's future.

The bachelor's degree program **International Digital Business (B.Sc.)** invites you to an **exploration of these digital industries** and to prepare yourself for starting a professional career in a digital company.

Professional field

Graduates of this degree program have excellent entry-level opportunities with international companies and organisations, especially in digital industries. They work in both strategic and operative management, especially in the areas of Organisational Design, IT, and Marketing.

Graduates are also qualified to study a range of Master's degrees.

Degree structure

The „B.Sc. International Digital Business“ is a **Business Administration degree program** focusing on business information systems and specialising on digital industries.

The degree program is predominantly taught in English, a small part in German. It includes a **semester abroad** at one of the university's approximately 180 partner universities and an **internship semester** at an internationally active company.

The study program unfolds along a **project-based didactic approach**, in which scientific foundations are applied to frame

and solve real business problems.

Key qualification modules train transdisciplinary skills such as project management, storytelling and research methodology.

Elective modules allow students to deepen their study interests both within and across subjects, e.g. by learning Spanish or Chinese or gaining insights into the Arts and Humanities.

Course contents

The program combines teaching of foundational competencies in business administration with that of specialized digital and methodological competencies and key qualifications.
