Credits (ECTS)	<b>210</b>
Language of instruction	<b>German / English</b>
Department / Central Institute	<b>Department of Business and Economics</b>

### Degree programme

Economic systems and cycles are highly complex. Those interested in their development and functioning would be well-advised to study the Bachelor's degree programme Economics. The syllabus is established on a demanding foundation of Business and Economics including quantitative methods and Mathematics for Business and Economics.

The practical teaching phases conducted at the interface between Economics and Politics enable students to develop the necessary cognitive approach which ensures they can meet every challenge. Acquiring both specialist and comprehensive skills and knowledge, students are able to complement them with an application-relevant approach.

The offer of numerous specialist courses taught entirely in English represent the ideal preparation for study abroad or an international internship. Graduates have the best chances to work in international organizations or go on to study for a Master's degree taught in English

### Professional field

The interdisciplinary programme represents the perfect combination of theory and practice, equipping graduates with the skills and knowledge requisite to a stimulating career in government or industry.

The strongly international orientation of the degree programme Economics represents the ideal qualification for tasks in international organizations, companies, institutions, associations and pressure groups. It also qualifies its holder for study on a range of Master's degrees.

### Degree structure

Divided into two parts, the sixth semester is intended for the completion of an internship. Students can also study abroad in Part Two or complete an international internship semester at a range of partner companies.

### Course contents

#### Part One

##### Foundation modules

- Microeconomics
- Macroeconomics
