

Confirmation of the level of crediting for a course as part of the sustainability certificate

Dear lecturer,

Your student would like to complete the sustainability certificate. As the sustainability-relevant content in your course depends on the specific structure of the project work or the semester plan, its creditability must be confirmed separately by you. In order to take a course within the academic component (I) of the sustainability certificate into account, it must provide sustainability-related content and competences. In addition to full recognition of the credit points earned in the course, only partial credit recognition may be justified within the certificate, depending on the scope of the sustainability content in the overall course. Please estimate, based on the thematic focus of the course and the individual specialization/project work chosen by the student how many credit points correspond to the sustainability content and confirm this using the form below.
Thank you very much for your support!

Name of student:

Name of course:

Course number:

Lecturer:

Name of project/specialization:

Amount of credit points that can be credited for sustainability-relevant content:

Note, comment:

I confirm that the student in the course taught by me has dealt in depth with topics of sustainability and propose that with the above-mentioned number of credit points for the sustainability certificate.
